PROFILE

Aspiring Software Engineer with a strong academic foundation in Software Engineering and 6 months of hands-on experience working on MERN stack projects. Solid background in web development and AI applications, with a demonstrated ability to collaborate effectively in IT workshops and show leadership through active participation in BCAS IT Society events. Eager to contribute to Excelacom's software solutions by applying solid skills in JavaScript and a growing interest in database and cloud server technologies.

EDUCATION

ICBT Campus - Colombo

BSc (Hons), Software Engineering

May 2025 - Present

British College of Applied Studies-Kalmunai

BTEC Higher National Diploma, Computing, Software Engineering

Jun 2023 - Dec 2024

EXPERIENCE

Software Development Intern

March 2025 - Jul 2025

SoftXpert

- 4-Month Internship | Remote
- A highly motivated Software Developer Intern with 4 months of hands-on experience in developing a full-stack web-based Clinical Appointment Booking System.
- Proficient in building user-friendly interfaces, implementing backend logic, and integrating essential features such as authentication, appointment scheduling, and role-based dashboards.
- Gained remote teamwork experience using Git for task and code management, with strong skills in version control, documentation, problem-solving, and building solutions suited to real healthcare workflows.

IT Lab Assistant (Training Program)

Feb 2025 - Aug 2025

AK Minhaj M.V National School

- Completed a 6-month training program providing comprehensive technical support for school computer laboratory operations
- Applied hardware and software troubleshooting techniques to resolve technical issues for students and faculty
- Managed system configurations, software installations, and ensured proper functioning of computer laboratory equipment
- Provided day-to-day technical support for computer operations, school events, and presentations

PROJECTS & PRODUCTS

Student Exam Performance Prediction System

- Problem: Difficulty in identifying students needing additional support based on exam performance trends.
- Solution: Leveraged AI to develop a prediction system that analyzes performance data and identifies students requiring intervention.
- Impact: Improved academic support strategies by providing actionable insights for educators.

Undergraduate Students' Perceptions of AI in Education Research Project

Feb 2024 - Dec 2024

- Conducted a survey-based study on university students' attitudes toward AI in education, collecting 160+ responses via Lime Survey and analyzing them using descriptive statistics and hypothesis testing. Synthesized relevant literature to support academic

context.

Identified key perceptions of AI, noting high awareness (65%), curiosity (52%), and concerns about reduced human interaction. Highlighted acceptance drivers and common information sources, with most students relying on the internet (88%) and social media (74%).

ABC Hospital Virtual Appointment System

Oct 2023 - Mar 2024

Full-Stack Development | Technologies: HTML5, CSS3, Bootstrap, JavaScript, PHP, MySQL

- Developed multi-role hospital appointment web application with Admin, Doctor, Receptionist, and Patient dashboards
- Implemented secure authentication, data validation, and appointment management (booking/viewing/cancellation)
- Created responsive UI with Bootstrap and conducted comprehensive testing using Postman and browser dev tools

Clinical Appointment Management System | <https://clinical-site-test.vercel.app/> Mar 2025 - May 2025

Full-Stack Development | MERN Stack Technologies: MongoDB, Express.js, React.js, Node.js

- Developed a 2-tier Clinical Center–Service Provider system with role-based access, advanced appointment booking (multi-filter search by city, specialization, doctor, date), and real-time doctor availability.
- Built full appointment lifecycle management—booking, rescheduling, automated status tracking, notifications—along with patient profile management, automated receipts, and real-time booking updates.

Sales Analysis Application | Technologies: Python, Dash, Pandas, Plotly

- Developed an interactive, SOLID-compliant web application using Dash to analyze customer transaction data, deliver clear insights, and support data-driven decisions through dynamic, user-friendly visualizations.
- Ensured high scalability and maintainability by applying clean coding practices, interface-driven design, and structured methods, resulting in clear, readable, and easily extendable code.

SKILLS

- **Frontend Development:** HTML, CSS, Tailwind CSS, JavaScript, React, Next.js, Figma (UI/UX design), machine learning
- **Backend & Full Stack Development:** PHP, Laravel(learning), Python, Node.js (assumed via React/Next), XAMPP, Postman
- **Database Management:** MySQL, MongoDB
- **Programming Languages:** JavaScript, Python, PHP
- **Version Control Systems:** Proficient in Git for version control, including experience with GitHub, GIT. Capable of managing branches, merging changes, resolving conflicts, and collaborating effectively in team environments.
- **Other Skills:** Agile Methodologies, Basic Knowledge of AI-driven Applications.

CERTIFICATIONS

- **PC Clinic Program:** Certified for active participation in a troubleshooting workshop, enhancing practical software problem-solving Skills.
- Getting Started with Full Stack Java Development
