

HIMAS AHAMED

58c, Malwatte Road, Dehiwala, Sri Lanka | +94-757-181-903 | himasahamet@gmail.com | [LinkedIn](#) | [GitHub](#) | Portfolio: [portfolio-website-peach-omega.vercel.app](#)

PROFILE

Aspiring Software Engineer with a strong academic foundation in Software Engineering and 6 months of hands-on experience working on MERN stack projects. Solid background in web development and AI applications, with a demonstrated ability to collaborate effectively in IT workshops and show leadership through active participation in BCAS IT Society events. Eager to contribute to innovative software solutions by applying solid skills in JavaScript and a growing interest in database and cloud server technologies.

EDUCATION

ICBT Campus – Colombo May 2025 – Present

BSc (Hons), Software Engineering

British College of Applied Studies – Kalmunai Jun 2023 – Dec 2024

BTEC Higher National Diploma, Computing, Software Engineering

EXPERIENCE

Software Development Intern March 2025 – July 2025

SoftXpert

- 5-Month Internship | Remote
- Developed a full-stack web-based Clinical Appointment Booking System, gaining hands-on experience across the complete MERN stack.
- Built user-friendly interfaces, implemented backend logic, and integrated key features including authentication, appointment scheduling, and role-based dashboards.
- Gained remote teamwork experience using Git for task and code management, with strong skills in version control, documentation, problem-solving, and building solutions suited to real healthcare workflows.

IT Lab Assistant (Training Program) Feb 2025 – Aug 2025

AK Minhaj M.V National School

- Completed a 6-month training program providing comprehensive technical support for school computer laboratory operations.
- Applied hardware and software troubleshooting techniques to resolve technical issues for students and faculty.
- Managed system configurations, software installations, and ensured proper functioning of computer laboratory equipment.
- Provided day-to-day technical support for computer operations, school events, and presentations.

PROJECTS & PRODUCTS

Room Reservation System | *Java, Servlets, JSP, MySQL, HTML/CSS, Tomcat*

- Developed full-stack web application for hotel room booking with admin/staff authentication, reservation management, and automated billing calculation.
- Implemented real-time database integration using MySQL with CRUD operations for reservations, users, and room rates.
- Created responsive UI with validation, session management, and PDF invoice generation.
- Applied MVC architecture with DAO pattern and Git version control.

Diabetes Prediction System | *Python, Scikit-learn, XGBoost, Streamlit, Pandas*

- Built a machine learning model achieving 72.6% ROC-AUC for diabetes risk prediction using health and lifestyle indicators (age, BMI, BP, physical activity).
- Implemented 5-fold stratified cross-validation comparing Logistic Regression, Random Forest, XGBoost, and ANN models.

- Deployed an interactive web application using Streamlit supporting single and batch predictions with probability outputs.
- Applied comprehensive preprocessing pipelines including imputation, scaling, and one-hot encoding.

ABC Hospital Virtual Appointment System

Oct 2023 – Mar 2024

Full-Stack Development | Technologies: HTML5, CSS3, Bootstrap, JavaScript, PHP, MySQL

- Developed a multi-role hospital appointment web application with Admin, Doctor, Receptionist, and Patient dashboards.
- Implemented secure authentication, data validation, and appointment management (booking, viewing, cancellation).
- Created responsive UI with Bootstrap and conducted comprehensive testing using Postman and browser dev tools.

Clinical Appointment Management System | clinical-site-test.vercel.app | Mar 2025 – May 2025

Full-Stack Development | MERN Stack: MongoDB, Express.js, React.js, Node.js

- Developed a 2-tier Clinical Center–Service Provider system with role-based access, advanced appointment booking (multi-filter search by city, specialization, doctor, date), and real-time doctor availability.
- Built full appointment lifecycle management—booking, rescheduling, automated status tracking, notifications—along with patient profile management, automated receipts, and real-time booking updates.

Sales Analysis Application | Python, Dash, Pandas, Plotly

- Developed an interactive, SOLID-compliant web application using Dash to analyze customer transaction data and support data-driven decisions through dynamic, user-friendly visualizations.
- Ensured high scalability and maintainability by applying clean coding practices, interface-driven design, and structured methods, resulting in clear, readable, and easily extendable code.

SKILLS

- **Frontend Development:** HTML, CSS, Tailwind CSS, JavaScript, React, Next.js, Figma (UI/UX Design)
- **Backend & Full Stack Development:** PHP, Laravel (learning), Python, Node.js, XAMPP, Postman
- **Machine Learning:** Scikit-learn, XGBoost, Pandas, Streamlit
- **Database Management:** MySQL, MongoDB
- **Programming Languages:** JavaScript, Python, PHP
- **Version Control:** Git, GitHub – branching, merging, conflict resolution, team collaboration
- **Other:** Agile Methodologies, AI-driven Application Development

CERTIFICATIONS

- PC Clinic Program: Certified for active participation in a troubleshooting workshop, enhancing practical software problem-solving skills.
- Getting Started with Full Stack Java Development – Simplilearn
